

PLANTIGRADA

Meaning: Plantigrada is a classification of mammals that walk on the soles of their feet, including species like bears and humans.

1. Plantigrada refers to a group of mammals that walk on the soles of their feet, such as bears and humans.
2. The study of plantigrada focuses on their unique locomotion and how it evolved over time.
3. In the animal kingdom, plantigrada is often contrasted with digitigrade animals, which walk on their toes.
4. Researchers found that plantigrada exhibit distinct skeletal adaptations that support their upright posture.
5. Conservation efforts for plantigrada species are crucial, as many face habitat loss and other environmental threats.
