

PLUTONIC

Meaning: Plutonic refers to something that is deep, profound, or originating from beneath the Earth's surface, often used in the context of non-romantic deep relationships or geological formations resulting from magma crystallization.

1. The concept of Plutonic love often refers to deep friendships that lack romantic or sexual elements.
2. Geologists often study Plutonic rocks, which are formed from the slow crystallization of magma beneath the Earth's surface.
3. In literature, Plutonic relationships can symbolize a connection that transcends physical attraction.
4. The artist's latest work explores Plutonic themes, emphasizing the beauty of emotional intimacy over physical desire.
5. Many philosophers argue that true Plutonic connections can lead to profound personal growth and understanding.
