

PNEUMOTHORAX

Meaning: Pneumothorax is a medical condition characterized by the presence of air in the pleural space, leading to lung collapse and respiratory distress.

1. A pneumothorax can occur spontaneously or as a result of trauma to the chest.
2. Patients with a pneumothorax often experience sudden chest pain and shortness of breath.
3. Diagnosis of a pneumothorax typically involves a physical examination and imaging studies like a chest X-ray.
4. Treatment for a pneumothorax may include observation, needle decompression, or surgical intervention.
5. Recognizing the symptoms of a pneumothorax is crucial for prompt medical attention and recovery.
