

POLARIZATION

Meaning: Polarization refers to the division into two sharply contrasting groups or opinions, or the orientation of waves, particularly light waves, in a specific direction.

1. The polarization of public opinion on the issue has made it difficult for lawmakers to reach a consensus.
2. Recent studies have shown the polarization of light can enhance the efficiency of solar panels.
3. Social media has contributed to the polarization of political views, creating echo chambers among users.
4. The polarization of the debate around climate change has hindered progress in environmental policy.
5. In physics, polarization refers to the orientation of the oscillations of a wave, particularly in light waves.
