

POLYGENIST

Meaning: A polygenist is a person who believes that different human races have distinct origins rather than deriving from a single ancestral source.

1. The term 'polygenist' refers to someone who supports the idea that human races have different origins.
2. In the 19th century, many polygenists argued against the notion of a single human ancestry.
3. The polygenist perspective was often used to justify social hierarchies and racial discrimination.
4. Some scientists today criticize polygenists for their outdated views on human evolution and race.
5. Despite its historical significance, the polygenist theory has been largely discredited in modern anthropology.
