

POPLAR

Meaning: Poplar: a fast-growing tree of the genus Populus, characterized by tall stature and broad leaves, commonly found in temperate regions.

1. The tall poplar trees swayed gently in the breeze, casting elongated shadows on the ground.
2. In spring, the poplar leaves unfurl, creating a vibrant green canopy overhead.
3. Artists often find inspiration in the striking silhouette of a solitary poplar against a sunset.
4. The farmer decided to plant a row of poplars along the boundary of his property for added privacy.
5. Poplar wood is favored by carpenters for its light weight and ease of working.
