

PREDICATE

Meaning: A predicate is the part of a sentence or expression that describes the action or state of the subject, often including the verb and any objects or modifiers.

1. The predicate of a sentence describes what the subject does or is.
2. In logic, a predicate expresses a property or relation that can be attributed to the subject.
3. Every complete sentence contains a subject and a predicate that work together to convey meaning.
4. In mathematics, the predicate often involves variables that can be true or false depending on the input.
5. She focused on simplifying the predicate to make her argument clearer in the essay.
6. The teacher explained how to identify the subject and predicate in a sentence.
7. In logic, a predicate is often used to make a claim about a subject.
8. The software can analyze the sentence structure to highlight the predicate.
9. In linguistics, the term 'predicate' refers to the part of the sentence that describes the action or state of the subject.
10. To form a complete thought, a sentence must include both a subject and a predicate.
11. A sentence's predicate contains the verb and all the words that describe what the subject does.
12. In logic, a predicate can be understood as a statement that expresses a property or relation.
13. The teacher explained how to identify the predicate in complex sentences.
14. To fully grasp the meaning, it's essential to focus on both the subject and the predicate.
15. In the phrase "The dog barks loudly," "barks loudly" serves as the predicate.
