

PROPELLER

Meaning: A propeller is a mechanical device with blades that rotates to generate thrust for vehicles, such as airplanes and boats, enabling them to move through air or water.

1. The airplane's propeller spun rapidly as it prepared for takeoff.
2. He carefully inspected the boat's propeller for any signs of damage.
3. A strong gust of wind caught the propeller, causing it to vibrate.
4. The mechanic explained how the propeller affects the aircraft's performance.
5. In the calm waters, the propeller created gentle ripples around the kayak.
