

PROTECTIONIST

Meaning: Protectionist: relating to policies or measures that restrict international trade to protect domestic industries from foreign competition.

1. The protectionist policies implemented by the government have sparked debates among economists.
2. In response to global trade tensions, the country adopted a more protectionist stance to safeguard local industries.
3. Many believe that protectionist measures can lead to higher prices for consumers and reduced choices in the market.
4. The rise of protectionist sentiment in recent years has challenged the principles of free trade that many nations once embraced.
5. Advocates of protectionist strategies argue that they are necessary to protect jobs from foreign competition.
