

PTILOSIS

Meaning: Ptilosis refers to the condition of feather loss or abnormal feather shedding in birds and can also occur in pets due to skin conditions or allergies.

1. Ptilosis can often be seen in birds that are molting, as they shed old feathers for new ones.
2. Veterinarians may notice ptilosis in pets suffering from certain skin conditions or allergies.
3. The study of ptilosis has revealed fascinating insights into the health and behavior of avian species.
4. In some cases, ptilosis is a sign of underlying stress or nutritional deficiencies in animals.
5. Birdwatchers often use the term ptilosis to describe the appearance of a bird's plumage during seasonal changes.
