

PYROBORIC

Meaning: Pyroboric refers to materials or compounds that exhibit special properties suitable for high-temperature applications, particularly in energy systems.

1. The researchers were fascinated by the unique properties of pyroboric materials in high-temperature applications.
2. In the lab, we experimented with pyroboric compounds to enhance the efficiency of our energy systems.
3. Pyroboric glass is often used in advanced electronics due to its excellent thermal stability.
4. The team presented a groundbreaking study on the synthesis of pyroboric substances for industrial use.
5. Understanding the behavior of pyroboric alloys is crucial for developing next-generation aerospace components.
