

# PYROCATECHIN

*Meaning: Pyrocatechin is a chemical compound, specifically a dihydroxybenzene, used in organic synthesis and studied for its antioxidant properties.*

1. Pyrocatechin is often used in the synthesis of various organic compounds due to its reactivity.
2. Researchers are exploring the potential antioxidant properties of pyrocatechin in food preservation.
3. The chemical structure of pyrocatechin allows it to participate in numerous redox reactions.
4. In analytical chemistry, pyrocatechin can serve as a reagent for detecting certain metal ions.
5. Industrial applications of pyrocatechin include its use in dye manufacturing and pharmaceuticals.
