

# PYROSIS

*Meaning: Pyrosis is a medical term for a burning sensation in the chest, commonly known as heartburn, often triggered by certain foods or digestive issues.*

1. Pyrosis can often be mistaken for more serious conditions affecting the gastrointestinal tract.
2. Many people experience pyrosis after consuming spicy foods or large meals.
3. The patient reported experiencing pyrosis frequently, prompting a visit to the gastroenterologist.
4. To alleviate pyrosis, some individuals find relief in over-the-counter antacids.
5. Understanding the triggers of pyrosis can help individuals manage their symptoms more effectively.
