

QUADRIPENNATE

Meaning: Quadripennate refers to a structural arrangement characterized by four feather-like divisions or segments, often used to describe certain muscle fibers or leaf structures.

1. The quadripennate arrangement of muscle fibers allows for greater force generation in the human body.
2. In botanical terms, the quadripennate leaf structure is characterized by its four distinct segments.
3. The artist's design featured a quadripennate motif that added a unique flair to the otherwise traditional piece.
4. Researchers studied the quadripennate form of certain bird wings to understand their flight dynamics better.
5. In the context of architecture, the quadripennate arches provided both stability and aesthetic appeal to the structure.
