

QUATERNATE

Meaning: Quaternate refers to a botanical arrangement where leaves or flowers are grouped in sets of four along a stem.

1. The leaves of the plant are arranged in a quaternate pattern along the stem.
2. The quaternate structure of the flowers adds to the uniqueness of the species.
3. In the quaternate arrangement, each set of leaves emerges at right angles to the previous pair.
4. The research focused on the quaternate growth of the algae in varying environmental conditions.
5. Botanists often describe the quaternate features of certain trees as a key identification characteristic.
