

QUITTOR

Meaning: Quittor is a chronic disease in horses characterized by the formation of a painful, necrotic lesion in the foot, often leading to lameness.

1. The horse suffered from quittor, causing significant pain and lameness.
2. Veterinarians recommend early intervention to prevent quittor from worsening.
3. After months of treatment, the farrier was relieved to see the horse recover from quittor.
4. Understanding the symptoms of quittor is essential for any horse owner.
5. The farrier explained how quittor could lead to more serious hoof issues if left untreated.
