

RAPTOR

Meaning: Raptor refers to a bird of prey or, in paleontology, a carnivorous dinosaur belonging to the group known as dromaeosaurids, characterized by a sharp, curved claw on each foot.

1. The paleontologist was thrilled to discover new fossils of a raptor species in the desert.
2. In the world of film, the raptor has become synonymous with thrilling dinosaur chases.
3. Birds are often considered modern-day raptors, sharing ancestry with the ancient predatory dinosaurs.
4. The raptor's agility and speed made it a highly effective hunter in its prehistoric environment.
5. Visitors to the museum marveled at the life-sized replica of the raptor that stood in the exhibit.
