

RARIFICATION

Meaning: Rarification is the process of reducing the density or concentration of a substance, particularly in reference to the thinning of the atmosphere or air molecules at high altitudes.

1. The rarification of the atmosphere at high altitudes can lead to altitude sickness.
2. Scientists study the rarification of air molecules to understand climate change better.
3. In rarefied environments, such as deep space, the rarification of matter poses unique challenges for exploration.
4. The artist's latest work reflects a rarification of themes, focusing on simplicity and minimalism.
5. During the conference, experts discussed the rarification of resources and its impact on global economies.
