

REACTIVE

Meaning: Reactive: responding to a situation or stimulus after it occurs, rather than anticipating or preventing it.

1. The company adopted a proactive approach rather than waiting for reactive measures to address customer complaints.
2. Children often exhibit reactive behavior when they feel threatened or overwhelmed in new situations.
3. The patient's reactive response to the medication indicated that further treatment options needed to be explored.
4. In a rapidly changing market, businesses must be reactive to trends to remain competitive.
5. Her reactive nature often led her to respond emotionally before fully processing the situation.
