

REFUTABILITY

Meaning: Refutability is the quality of a statement or hypothesis that allows it to be proven false through evidence or argumentation.

1. The scientific method relies heavily on the principle of refutability to test hypotheses.
2. In philosophical debates, the concept of refutability is essential for distinguishing between valid arguments and mere opinions.
3. The refutability of a theory ensures that it can be proven false, which is a crucial aspect of scientific inquiry.
4. She argued that the lack of refutability in his claims undermined their credibility in the academic community.
5. Many consider the refutability of a statement to be a hallmark of rigorous intellectual discourse.
