

RELATIVITY

Meaning: Relativity is the scientific theory formulated by Einstein that describes the interdependence of space and time, particularly how they are affected by gravity and motion.

1. Relativity fundamentally changed our understanding of time and space.
2. Einstein's theory of relativity introduced the concept that gravity can bend light.
3. Many scientists believe that the principles of relativity apply not only to physics but also to social interactions.
4. The theory of relativity challenges our intuitive perceptions of motion and simultaneity.
5. In the realm of astrophysics, relativity helps explain the behavior of massive objects in the universe.
