

REMISSION

Meaning: Remission is a temporary reduction or disappearance of the signs and symptoms of a disease, particularly cancer.

1. After months of treatment, the doctor announced that her cancer was in remission.
2. The charity event was organized to raise funds for research on diseases in remission.
3. Many patients experience a sense of relief when they learn they are in remission.
4. Living in remission can often feel like a second chance at life for many survivors.
5. The psychological effects of remission can be just as significant as the physical recovery.
