

RESECTING

Meaning: Resecting refers to the surgical removal of a portion of tissue or an organ, typically to eliminate disease or improve health outcomes.

1. Resecting the tumor was essential for ensuring the patient's recovery.
2. The surgeon explained that resecting the affected tissue would improve the patient's prognosis.
3. In complex cases, resecting multiple lesions may be necessary to achieve optimal results.
4. After resecting the damaged area, the medical team carefully monitored the patient's healing process.
5. Resecting the nerve was a last resort, but it was deemed necessary to alleviate the patient's pain.
