RESERVOR

Meaning: Reservoir: A large natural or artificial lake used to store water for supply, irrigation, or flood control.

1. The engineers focused on the construction of a new reservor to improve the city’s water supply.
2. After the heavy rains, the reservor quickly filled, providing much-needed relief to the drought-stricken area.
3. Local wildlife thrived around the reservor, creating a biodiversity hotspot in the otherwise dry landscape.
4. The community held a festival near the reservor to raise awareness about water conservation efforts.
5. During the summer months, the reservor became a popular spot for fishing and recreational activities.
