

RESIDUE

Meaning: Residue: a substance that remains after a process, such as a chemical reaction or the completion of a task, often in the form of a leftover or remaining material.

1. The residue left after the chemical reaction was a bright green powder.
2. After the meal, there was a residue of sauce left on the plate that needed to be scrubbed off.
3. The scientists carefully collected the residue from the experiment to analyze its composition.
4. She discovered a residue of dust on the old bookshelf, indicating it hadn't been touched in years.
5. The residue of paint on the brush suggested it had not been cleaned properly after the last project.
