

RESOLVENT

Meaning: A resolvent is a mathematical or chemical solution or method used to simplify or resolve complex problems or equations.

1. The mathematician sought a resolvent to simplify the complex equation.
2. In chemistry, the resolvent often plays a crucial role in determining reaction outcomes.
3. After much deliberation, they found a resolvent that satisfied all parties involved in the negotiation.
4. The software provided a resolvent that efficiently addressed the users' technical issues.
5. Through years of research, the scientist developed a new resolvent that transformed the field of material science.
6. The mathematician was excited to discover a new resolvent for the complex equation.
7. In chemistry, the resolvent often helps in identifying the components of a mixture.
8. When faced with difficult problems, finding a resolvent can simplify the process significantly.
9. The team worked tirelessly to derive a resolvent that could be applied to various scenarios.
10. During the lecture, the professor explained how the resolvent relates to polynomial equations.
