

RETRACTILE

Meaning: Retractable refers to the ability to be drawn back or withdrawn, particularly in relation to body parts like claws or suckers.

1. The retractile claws of the cat allow it to climb trees with ease.
2. Some species of octopus have retractile suckers that enhance their ability to catch prey.
3. The retractile nature of the fish's fins helps it maneuver swiftly through the water.
4. Many reptiles possess retractile tongue mechanisms, allowing them to capture insects efficiently.
5. The mechanism in this toy is retractile, providing a surprising element for young children.
