

RETREATMENT

Meaning: Retreatment refers to the process of administering a second or additional course of treatment for a medical condition after the initial treatment has proven ineffective.

1. The doctor recommended retreatment after observing the patient's persistent symptoms.
2. After the initial therapy failed, the team discussed the possibility of a retreatment plan.
3. Retreatment with a different medication showed promising results in the clinical trial.
4. Patients often feel anxious about the prospect of retreatment, fearing a lack of progress.
5. The retreatment strategy was adjusted based on the feedback from the patient's experiences.
