

RETROMINGENCY

Meaning: Retromingency refers to the phenomenon where cognitive processes or behaviors from earlier developmental stages re-emerge or influence adults, particularly in the context of aging.

1. The concept of retromingency challenges our understanding of cognitive development in adults.
2. Scientists are exploring how retromingency might explain certain behavioral patterns in aging populations.
3. In literature, retromingency can serve as a metaphor for the longing to revisit one's past.
4. The artist's work evokes feelings of retromingency, prompting viewers to reflect on their own childhood memories.
5. Psychologists are beginning to study the effects of retromingency on mental health and emotional well-being.
