

RHUMB

Meaning: A rhumb is a navigational line that crosses all meridians at a constant angle, used for plotting a steady course on a chart.

1. The sailor carefully plotted the rhumb line on the nautical chart to ensure a steady course.
2. In navigation, a rhumb is a line crossing all meridians at the same angle, simplifying long-distance travel.
3. As the ship sailed, the captain adjusted the sails to maintain the desired rhumb despite the shifting winds.
4. Understanding rhumb lines is essential for mariners who navigate using traditional methods.
5. The concept of rhumb lines dates back centuries, yet it remains relevant in modern navigation techniques.
