

RUNNET

Meaning: Runnet is a substance, typically derived from the stomach lining of ruminant animals, used in cheese-making to coagulate milk.

1. Runnet is an essential ingredient in the cheese-making process, helping to coagulate the milk.
2. Many artisanal cheesemakers prefer animal-derived runnet for its traditional qualities.
3. The use of vegetable rennet alternatives has gained popularity among vegan cheese producers.
4. After adding runnet to the milk, it usually takes about 30 minutes to curdle properly.
5. Understanding the role of runnet can greatly enhance one's appreciation for fine cheeses.
