

SABAL

Meaning: Sabal refers to a genus of fan palms native to the southern United States and tropical regions, known for their fan-shaped leaves and often used in landscaping and thatching.

1. The sabal palm is a striking feature of the southern landscape.
2. In some regions, sabal leaves are used to create intricate thatch roofs.
3. The sabal tree can grow to impressive heights, reaching up to 25 feet tall.
4. Tourists often visit the coastal areas to photograph the iconic sabal palms swaying in the breeze.
5. Sabal fruit is edible and has been foraged by local communities for generations.
