

# SAIGA

*Meaning: Saiga refers to a species of antelope (Saiga tatarica) characterized by its distinctive bulbous nose, native to the steppes of Central Asia and currently facing population decline.*

1. The saiga antelope is known for its distinctive bulbous nose, which helps filter out dust during dry seasons.
2. Conservation efforts are crucial for the survival of the saiga, as its population has dramatically declined in recent years.
3. Saiga horns are highly prized in traditional medicine, leading to illegal poaching and trade.
4. Researchers are studying the saiga's migratory patterns to better understand its habitat needs and threats.
5. The unique appearance of the saiga makes it a fascinating subject for wildlife enthusiasts and photographers alike.
