

SAINFOIN

Meaning: Sainfoin is a flowering plant (Onobrychis viciifolia) cultivated primarily as a forage crop for livestock, valued for its high protein content and ability to enhance soil health through nitrogen fixation.

1. Sainfoin is often planted as a forage crop due to its high protein content.
2. Farmers appreciate sainfoin for its ability to improve soil health through nitrogen fixation.
3. The vibrant pink flowers of sainfoin attract a variety of pollinators in the summer months.
4. In sustainable agriculture, sainfoin plays a crucial role in promoting biodiversity and soil fertility.
5. Livestock tend to prefer sainfoin over other forage options because of its palatability.
