

# SAMARA

*Meaning: Samara: a winged fruit or seed that is dispersed by the wind, commonly found in trees like maples.*

1. The samara, a winged fruit, is often dispersed by the wind.
2. In the fall, the maple trees drop their samaras, creating a beautiful scene on the ground.
3. Birds and small mammals often use samaras as a source of food during the colder months.
4. The unique shape of the samara allows it to glide through the air, maximizing its distance from the parent tree.
5. In botanical studies, samaras are important for understanding tree reproduction and seed dispersal mechanisms.
