

SANDERLING

Meaning: A sanderling is a small, migratory shorebird known for its quick movements along sandy beaches while foraging for food.

1. The sanderling scurried along the shoreline, searching for small crustaceans.
2. During the migration season, flocks of sanderlings can be seen darting across the beach.
3. Biologists study the sanderling to understand its unique feeding habits in coastal environments.
4. With its distinctive white and gray plumage, the sanderling blends perfectly into the sandy landscape.
5. Watching a sanderling run back and forth with the waves is a delightful sight for beachgoers.
