

# SAW-WHET

*Meaning: Saw-whet: a small, nocturnal owl species (Aegolius acadicus) known for its distinctive high-pitched call and often found in wooded areas.*

1. The saw-whet owl is known for its distinctive, high-pitched call that echoes through the forest at night.
2. During the winter months, birdwatchers often seek out the elusive saw-whet in the snowy woods.
3. The small size of the saw-whet makes it an endearing sight as it perches silently among the branches.
4. Researchers have studied the saw-whet's migratory patterns to better understand its behavior and habitat needs.
5. With its big, round eyes and tufted feathers, the saw-whet is a charming little predator of small mammals and insects.
