

SCAFFOLDING

Meaning: Scaffolding is a temporary structure made of wooden planks or metal poles used to support workers and materials during the construction or renovation of buildings.

1. The workers carefully assembled the scaffolding to ensure safety while painting the high-rise building.
2. During the renovation, scaffolding was erected around the historic structure to provide access for the contractors.
3. The construction crew inspected the scaffolding daily to comply with safety regulations and prevent accidents.
4. Brightly colored tarps were hung from the scaffolding to shield the worksite from the elements.
5. As the project progressed, the scaffolding was gradually dismantled, revealing the newly restored facade.
