

SCLEROTITIS

Meaning: Scleritis is the inflammation of the sclera, the white outer coating of the eyeball, which can cause discomfort and vision issues.

1. Scleritis can lead to significant discomfort and vision problems if left untreated.
2. The patient's symptoms suggested a diagnosis of scleritis, prompting further examination.
3. In rare cases, scleritis may be associated with systemic autoimmune conditions.
4. The ophthalmologist recommended corticosteroid therapy to manage the inflammation caused by scleritis.
5. Patients with scleritis often report a gradual onset of eye pain and redness.
