

SCOPELINE

Meaning: Scope line: a defined boundary or limit that outlines the extent of a project or task, often used to ensure accurate measurements and clarify responsibilities.

1. The architect carefully measured the scope line to ensure the building's dimensions were accurate.
2. During the project meeting, the team discussed the scope line to clarify the limits of their responsibilities.
3. Adjustments to the scope line were necessary after the client requested additional features for the project.
4. Understanding the scope line is crucial for avoiding scope creep in any major undertaking.
5. The engineers marked the scope line on the blueprint to define the area of work for the construction crew.
