

# SCORIFICATION

*Meaning: Scorification is the process of creating a surface pattern or texture, often used in archaeology to indicate age or in metallurgy for analyzing ore samples.*

1. The archaeologist noted the scorification on the ancient pottery as a sign of its age.
2. In metallurgy, scorification is a crucial process that helps in the analysis of ore samples.
3. The scorification pattern on the rock indicated it had been exposed to extreme temperatures.
4. Her research on scorification revealed new insights into the early methods of metal extraction.
5. Artists often use scorification techniques to create unique textures on their sculptures.
