

SELENIC

Meaning: Selenic refers to a chemical compound or acid containing selenium, particularly characterized by its oxidizing properties, such as selenic acid (H₂SeO₄).

1. The selenic acid was carefully analyzed in the lab for its chemical properties.
2. Scientists discovered an interesting reaction when they combined the selenic compound with other elements.
3. Due to its reactivity, selenic acid must be handled with extreme caution in the laboratory.
4. The researchers hypothesized that selenic compounds could play a role in environmental remediation.
5. Selenic minerals are often found in volcanic areas, showcasing unique geological formations.
