

# SEMITRANSEPT

*Meaning: A semitranssept is a part of a church or cathedral that extends from the main body and is typically used to enhance light and space, often featuring architectural details like carvings.*

1. The architect designed a semitranssept to enhance the flow of light throughout the cathedral.
2. During the renovation, the semitranssept revealed intricate stone carvings that had been hidden for centuries.
3. Visitors admired the unique layout of the semitranssept, which created a more intimate worship space.
4. The church's semitranssept allowed for additional seating without compromising the historical integrity of the building.
5. In traditional Gothic architecture, the semitranssept often serves as a transitional area between the nave and the choir.
