

# SEMIVOWEL

*Meaning: A semivowel is a speech sound that has characteristics of both a vowel and a consonant, typically represented by the letters 'y' and 'w' in English.*

1. A semivowel functions as a consonant in some contexts while still allowing for vowel-like qualities.
2. In English, the letters 'y' and 'w' are often considered semivowels due to their dual function.
3. The pronunciation of semivowels can significantly affect the rhythm and flow of a sentence.
4. Understanding the role of semivowels can enhance one's grasp of phonetics and pronunciation.
5. Linguists study semivowels to better understand the interactions between consonants and vowels in speech.
