

SERRATION

Meaning: Serration refers to a series of notches or grooves along the edge of a blade or tool that enhance its cutting ability.

1. The serration on the knife blade allows for a more effective cutting motion through tough materials.
2. He admired the intricate serration along the edge of the ancient sword displayed in the museum.
3. The chef preferred using a serrated knife to slice bread, as it prevents squishing the loaf.
4. Serration can be found not only in tools but also in the leaves of certain plants, enhancing their adaptability.
5. The design of the serration on the saw makes it ideal for cutting through both wood and metal.
