

SHAFTING

Meaning: Shafting refers to the act of designing, constructing, or utilizing a shaft in machinery, or, in a figurative sense, the unfair treatment or criticism one receives from others.

1. The engineer explained the process of shafting as it relates to the design of the machinery.
2. He was frustrated by the shafting he received from his colleagues during the meeting.
3. The mechanic noticed that the shafting in the engine was misaligned, causing performance issues.
4. In the context of the novel, shafting referred to the betrayal of a trusted friend.
5. The artist used the concept of shafting to symbolize the struggle between power and vulnerability in her latest work.
