

SHREWMOUSE

Meaning: A shrewmouse is a small, mouse-like mammal belonging to the family Soricidae, commonly found in forests and characterized by its scurrying movement and resemblance to true mice.

1. The shrewmouse scurried across the forest floor, barely making a sound.
2. In her biology class, she learned that the shrewmouse is often mistaken for a small mouse due to its size.
3. The natural habitat of the shrewmouse includes dense underbrush and leaf litter where it can forage for insects.
4. During the winter months, the shrewmouse hibernates in burrows to escape the cold.
5. Researchers are studying the shrewmouse to better understand its role in the ecosystem.
