

SIDE-WHEEL

Meaning: Side-wheel refers to a type of boat or steamboat that is propelled by large paddle wheels located on the sides of the vessel.

1. The side-wheel steamboat glided gracefully along the river, its massive wheels churning the water.
2. Innovative designs of side-wheel boats often prioritized both speed and stability on turbulent waters.
3. While many modern vessels use different propulsion methods, the charm of a side-wheel paddleboat remains unmatched.
4. The side-wheel configuration allowed for a unique aesthetic that captivated passengers on leisurely cruises.
5. Engineers celebrated the side-wheel design for its effectiveness in navigating shallow coastal areas.
