

SIFTER

Meaning: A sifter is a kitchen or tool device used to separate and break up clumps in dry ingredients, typically by passing them through a mesh or screen.

1. The baker used a fine sifter to create a smooth flour mixture for the cake.
2. After collecting the sand, she carefully poured it through a sifter to remove any debris.
3. In the kitchen, the sifter became an essential tool for achieving the perfect texture in her pastries.
4. He quickly grabbed the sifter to dust powdered sugar over the freshly baked cookies.
5. Using a sifter not only lightens the flour but also ensures even distribution of ingredients in the batter.
