

SILO

Meaning: SILO: A tall, cylindrical structure used for storing bulk materials, such as grain, or a metaphor for departments within an organization that operate independently and do not share information.

1. The farmer stored the grain in a large, cylindrical silo to protect it from the elements.
2. In businesses, silos often refer to departments that operate in isolation from one another.
3. The construction of the new silo was essential for increasing the farm's storage capacity.
4. To improve collaboration, the company's management sought to break down the silos between different teams.
5. The artist used the abandoned silo as a canvas for her vibrant mural, transforming it into a landmark.
